

**Capabilities Statement**  
**Silicon Networks Group LLC**  
Phone: (775) 945-9825

**Company Overview:**

**Silicon Networks Group LLC** is a leading provider of network engineering services with a specialized focus on the Internet of Things (IoT), offering innovative and reliable internet solutions for diverse industries. As an IBM Business Partner since 2001, we deliver comprehensive networking services including local and wide-area networking, wireless connectivity, and cloud solutions, with a proven track record of supporting mission-critical infrastructure for various sectors, including transportation, government, and industrial applications.

**Core Competencies:**

- **Network Engineering & IoT Solutions:** Providing Internet services for remote locations such as locomotives, fire stations, highway signs, industrial trailers, heavy equipment, service vehicles, and drones.
- **Wide and Local Area Networking:** Custom-designed networking solutions for various enterprise and government needs.
- **IBM & Lenovo Expertise:** Offering a range of solutions with IBM and Lenovo products, including workstations, servers, and networking equipment available via GSA Schedule.
- **Custom Network Solutions:** Configuring and delivering complete "network-in-a-box" solutions, which include pre-configured servers, workstations, and routers, all ready for deployment upon arrival.

**Differentiators:**

- **Timely Delivery of Cloud Solutions:** Efficient deployment of Lenovo workstations and cloud-based services to meet client demands.
- **Simplified Deployment:** We offer pre-configured and labeled network systems that provide plug-and-play functionality for immediate use.
- **Extensive Product Offering:** Ability to provide both new and refurbished Lenovo products with full compatibility and seamless integration.

**Past Performance:**

With over two decades of experience, Silicon Networks Group LLC has delivered best-in-class networking services across a variety of industries:

- **Wireless & 5G Connectivity:** Providing Ethernet connectivity for moving trains, wireless climate control systems on container ships, and logistics support for warehouse management systems.
- **Public Sector Solutions:** Supporting the National Park Service with remote connectivity for visitor centers.
- **Comprehensive IoT Solutions:** Delivering wireless internet services to rural America, ensuring reliable connectivity for remote areas.

Our past clients include high-profile organizations in industries such as government, transportation, and logistics, with proven success in offering solutions from top manufacturers like HP, IBM, Symbol, and Zebra.

**Company Information:**

- **Legal Structure:** Registered Nevada Limited Liability Company
- **D-U-N-S Number:** 05-487-9257
- **Nevada Business License Number:** NV20161702638
- **EIN:** 30-0965769
- **SIC Code:** 73730302
- **NAICS Code:** 541512Z

- **SAM Registration:** 054879257 / 8CLZ8
- **Location:** Mineral County, Nevada 89415 (Hub Zone Qualified)
- **Certifications:** SBA 8(a) Loan Program, Women-Owned Business

**Service Area:**

- **Onsite Network Support:** Serving California, Nevada, Utah, Arizona, and New Mexico
- **Remote Access & Nationwide Web Sales:** Available for clients across the United States.

**Payment Methods Accepted:**

- American Express, Discover, MasterCard, Visa
